GENERAL INFORMATION

Historical Note

The opening of the University of Basutoland, Bechuanaland and Swaziland (UBBS) on January 1st 1964 was the outcome of an agreement reached in mid-1962 between the High Commission Territories and the Oblate of Mary Immaculate of Pius XII Catholic University, Roma, Lesotho. Pius XII College of Roma, 35 kilometres from Maseru, was itself the product of the desire for an institution of higher learning for Africans by the Catholic hierarchy in Southern Africa. It opened its doors to students in 1946, with five students and five priest-lecturers. In 1950, it was taken over by the Catholic Order of the Oblate of Mary Immaculate. By 1963 there were 180 students, both men and women, and several buildings, including a science block, refectory, administration complex and workshops. Courses followed at Pius XII College were taught and examined under a special relationship entered into in 1955 with the University of South Africa, which awarded students its degrees and diplomas in Arts, Science, Commerce and Education. Pius XII College experienced difficulties over finance for the expanding institution and over racial restrictions on student residence required by the University of South Africa. Negotiations with the High Commission Territories to transform the University College into a fully fledged University were therefore initiated during 1962. On June 13, 1963, a deed of cession and indemnity was signed by the Oblates and the High Commissioner of Basutoland, Bechuanaland and Swaziland. The new University, with Ford Foundation and British Government funds, purchased the assets of the Roma Campus for an indemnity of half of its value, in exchange for guarantees of a continuing Catholic presence on the campus.

UBBS became UBLS (The University of Botswana, Lesotho and Swaziland) in 1966 on the Independence of Botswana and Lesotho. From a total of 188 students in 1964, the University grew to 402 students in 1970, of whom 145 were from Lesotho, with lesser numbers from Swaziland, Botswana, Rhodesia, South Africa and elsewhere. UBLS conferred its first degrees in April 1st 1967 after a transitional period during which the former Pius XII College students continued to take University of South Africa degrees. UBLS offered its own four-year undergraduate degrees and diplomas in Arts (including Economics and Administration), Science and Education, with Law students following a five-year degree, including two years tuition at the University of Edinburgh. Students seeking specialised degrees in Medicine, Engineering, etc, proceeded to other universities after completing Part I (Years 1 and 2) studies in Science. The number of academic staff grew from 31 in 1964 to 78 in 1970. Staff members were recruited from many countries, but the University pursued an active localisation policy from 1971. UBLS was equally funded by the Governments of Botswana, Lesotho and Swaziland, but had comparatively little presence in Botswana and Swaziland in the first phase of its existence during 1964-1970. The only substantial 'devolution' of UBLS from Roma Campus came towards the end of this phase of University development and was the association of the Swaziland Agricultural College of Luyengo with the University, as the Swaziland Agricultural College and University Centre. This College, built for the Swaziland Government with Oxfam and 'Freedom from Hunger' funds, had been opened in 1966. In 1970, the Swaziland Government agreed to hand over the College to UBLS, together with the Research Division of the Ministry of Agriculture and its experimental station at Malkerns near Luyengo. From 1972, these together constituted a new Faculty of Agriculture. In Botswana, the UBLS presence was limited to the energies of the Division of Extra Mural Services and the School of Education, and a small Short-Course Centre built during 1969. With independence, the three countries began to take a closer look at the colonial inheritance of education, including their joint University, and began to identify the role of UBLS in higher and middle-level training. A series of academic planning reports for UBLS produced after 1966 culminated in the second Alexander Report of 1970, which combined, 'The major recommendations of previous reports for the development of university campuses in each country and the unified development of higher education and vocational and teacher training'. The report recommended that Part I studies begin in Botswana and Swaziland, with eventual division of Part II (Year 2 and 4) studies among the campuses, and the consideration of 'polytechnic' arrangements for technical and vocational courses. The second Alexander Report was accepted by the University and by the Governments of Botswana, Lesotho and Swaziland, at a meeting in October 1970, on the Luyengo campus. It heralded the second phase (1971-1976) of UBLS development. Plans were immediately drawn up to spend about one million Rand for campus development in each of the three countries. In Botswana and Swaziland there were to be campuses respectively within the capital of Gaborone, and at Kwaluseni adjacent to the national high school of Matsapha. Funds were obtained from the United States, British, Canada, Danish and Netherlands Governments as well as from the Governments of UBLS countries, the Anglo American Corporation and other bodies. Teaching of Part I began and temporary accommodation at Gaborone and Kwaluseni campuses became fully operational in 1971. In Swaziland, the William Pitcher and Nazarene Teacher Training Colleges were affiliated to the local university centre, as were the Francistown, Lobatse and Serowe Teacher Training Colleges in Botswana. Plans for specialised Part II and professional studies on each campus were dramatically advanced by the devolution of Part II Humanities teaching to Gaborone and Kwaluseni, as well as Roma, in 1974. Further negotiations between the

three governments and the University resulted in agreement on June 11, 1975, known as the 'Luyengo Package' which was accepted by all parties.

Following student unrest at Roma, and strained relations between the central UBLS administration and the Lesotho government over implementation of the 'Luyengo Package', the Roma campus was precipitately withdrawn from UBLS and constituted as the National University of Lesotho (NUL) on Monday October 20, 1975. This occurred at a time when a working group on further devolution of UBLS into three University Colleges was preparing its report for the Council of the University. The nationalization of all facilities, monies and files in Lesotho meant the central administration of UBLS could operate with only limited effectiveness from premises at Malkerns during 1975-1976, and considerable autonomy was devolved onto the Botswana and Swaziland campuses. Students from Botswana and Swaziland were immediately withdrawn from the Roma campus on the appropriation of all UBLS property in Lesotho by NUL. Part II teaching for students was resumed within a few months in Botswana (Economics and Social Studies and Science) and in Swaziland (Law). Following the acceptance of the Hunter Report and further negotiations between the University and the Governments of Botswana and Swaziland, the University of Botswana, Lesotho and Swaziland (UBLS) became the University of Botswana and Swaziland (UBS), with two constituent University Colleges of Botswana and Swaziland (UCB and UCS respectively). The new University structure was dedicated to maintaining and intensifying service to the ideals previously laid out for UBLS by the Botswana and Swaziland Governments. The ideals were summed up in the Second National Development Plan of Swaziland, which saw UBS as playing an 'increasingly important role in National Development not only through providing the educated manpower needed, but also through (the university's) great potential as a focus for the academic and cultural activities of the nation'. The ideals were also identified as the beginning of the devolution phase of UBLS development into Botswana and Swaziland by the then Chancellor, Seretse Khama, in his graduation speech in May 1970, on the Luyengo campus. "The University must be a committed institution, committed to the fulfillment of the ambitions and aspirations of the communities it was created to serve. One of these is rapid development, another is nonracialism, and the third is simply pride in ourselves and in our past, which in turn would lead to a greater degree of self-confidence, which is one of the very basic ingredients of true independent nationhood." The years 1976 and 1982 saw both constituent Colleges of the University develop their physical resources and their academic programmes in close cooperation with each other, with a view to the eventual establishment of separate national universities on the 1st July, 1982.

The formal inauguration of the University of Botswana was performed on 23rd October 1982 by His Excellency Sir Ketumile Masire, President of the Republic of Botswana. The University of Botswana and Swaziland continued to cooperate for a further six months to 31 December 1982 for the purpose of examining and awarding degrees, diplomas and certificates. In terms of an agreement between the Governments of Botswana and Swaziland, the National Universities in Botswana and Swaziland were to continue to exchange students and to cooperate in certain areas and to that end a consultative machinery set up to advise on how best to cooperate.

The University Organisation

The University of Botswana was established on 1st July 1982 by an Act of Parliament. The University campus consists of that part of the two former universities (UBLS and UBS - see Historical Note above) which was situated in Botswana and was sometimes referred to as the Gaborone Campus. The University is closely involved in the national development process of Botswana. In this regard the special functions of the University are to engage in improving the quality and in expanding the quantity of the human resources needed for development, and to act as the repository of the collective knowledge and experience of the nation and the world. The first of these functions is fulfilled through the teaching programmes offered by the University and its affiliated institutions, leading to the award of degrees, diplomas and certificates. The second function is carried out individually and collectively by the staff of the University and its affiliated institutions, through the research and development, consultancies and information services which they undertake. Like any other complex organisation, the University has established certain patterns of authority and specialisation, systems, and rules of procedure, in order to perform its functions in an orderly and effective manner. These regulate day-to-day work within the University.

The Council

The governing body of the University is the Council, which has the ultimate responsibility for the work and progress of the University towards the achievement of its goals. Its membership includes leading figures from the national and international community as well as senior personnel within the University. The Council has wide powers to make statutes, lay down policy, approve programmes and plans, and to establish working procedures governing the organisational life of the University. It also provides and controls the resources required to support both the academic activities and the physical

development and maintenance of the University. But as a mainly policy-making body the Council cannot, and should not, be engaged in the day-to-day administration of the University. Clearly it could not carry out efficiently all its wide responsibilities by itself. On academic matters it consults the Senate; on many other matters, while retaining overall control and responsibility, it delegates much of the detailed work to the officers and committees.

The Senate

The chief academic authority of the University is the Senate, whose membership includes the VC, DVCS, Faculty Deans, Faculty representatives and Heads of academic support units as well as student representatives. Under the Council, the Senate has the responsibility for the general control and direction of teaching and research activities, examinations, the conferment of degrees and award of diplomas and certificates. Much of its statutory authority is exercised through its approval and, from time to time, amendment of various sets of academic regulations, all of which are published for general information in the later sections of this Calendar. They include general and special academic regulations, admissions and examination procedures, degree structures, programmes of study, syllabuses, library regulations, etcetera. Regulations in any organisation may appear to restrict freedom of action, but are necessary for the orderly conduct of affairs. Additionally, in a University context, the regulations are the means by which the Senate ensures that the academic standards and quality of teaching are acceptable not only to the University and the nation, but also to the wider academic community of the world. Senate also delegates much of its detailed work to committees, reviewing the recommendations they bring forward for its approval.

Faculties and Departments

Below the level of the Vice Chancellor's office, the University is divided broadly into three types of specialised work: academic affairs, finance and administration, and student affairs. The academic side is represented by the Senate, Faculties, Schools, Departments and Institutes. Specialisation and the best use of staff expertise are achieved on the basis of the division of the academic areas into departments. Each department has a special focus, involving it in teaching and research in particular subjects or disciplines. These departments are responsible for the day-to-day teaching and research work of the University, and they formulate the programmes of study. A number of departments and similar or related disciplines are grouped together to constitute a Faculty. At present there are eight established faculties: Business, Education, Engineering and Technology, Humanities, Science, Social Sciences, Health Sciences, Medicine and a School of Graduate Studies. The Faculty of Health Sciences was formally established on 1 April 2006. Currently, the Faculty of Medicine is the newest faculty and it includes the School of Nursing, the School of Allied Health Professions and the School of Public Health. In general, departments in the same faculty work closely together in offering Degree, Diploma and Certificate Programmes. In many cases there is a similar cooperation between Faculties. Faculties are headed by Deans, who represent the Faculty on other bodies and who have general responsibility for coordinating the work of the Faculty. Faculties work through their Faculty Boards and a variety of committees established by the Boards. Proposals from departments are brought to Faculty Boards for discussion and may then be submitted to Senate and, when necessary, to Council. Decisions and directions are then transmitted back to departments through the same channels.

Student Financial Information

Student Financial Procedures

- 2.21 Reporting to the Finance Office is an integral part of registration; until financial clearance has been obtained from the Finance Office, registration will be deemed to be incomplete.
- 2.22 All fees must be paid by the first day of the semester. Sponsored students have to produce satisfactory evidence of the award of sponsorship.
- 2.23 Where a scholarship includes a student's personal allowance, the University may advance up to one half of it, at its discretion. If a student is not honored, a student may be asked to cancel registration immediately.
- 2.24 Scholarships administered by the University shall be awarded on the understanding that any monies received by the University and disbursed to or on behalf of the student, will be repayable by the student, should he or she withdraw during the course of the academic year without permission of the University.
- 2.25 Students who damage University property or equipment will be charged the cost of repair or replacement of the item(s). An annual caution fee is held to cover any such charges which are not otherwise settled upon demand. Before registering for a subsequent academic session, the caution fee must be restored. Unless an account for damage is settled immediately a student may be requested to withdraw.

2.26 Should a student leave the University without having paid the prescribed fees, including fines due, or without returning any library books, the academic results and transcripts and/or final certification for which a student is otherwise qualified, shall be withheld until such fees, library books or University property have been recovered.

2.27 Any registered student who decides to withdraw from the University must give notice of his/her intention to do so in writing to the relevant Head of Department and Dean's Office. All students shall be eligible to get 100% refund if they withdraw within the first 30 days each semester. Any registered student who withdraws from the University after the first 30 days shall be eligible for only 50% of tuition fee refund up to mid semester and any student withdrawing from the University after mid semester break of each semester shall not be eligible for any refund of fees.

2.28 Once a student has accepted an offer to reside in any hostel and has been duly registered for accommodation, (s)he shall remain so registered for the rest of the semester. Application or request to move out of the hostel during the semester shall not be acceded to.

Where a student moves out of the hostel on their own accord no refund of accommodation fees shall be made irrespective of the period of hostel occupation.

Where a student is allocated hostel space during the course of the semester, accommodation fees shall be charged on a pro rata basis.

Student Admissions

Prospective undergraduate applicants, may obtain application forms and information from the University Admissions Office located in Block 139 on the Main Campus. The forms must be returned directly to the Admissions Office at the University. For graduate programmes, admission applications are made direct to The Dean, School of Graduate Studies. It must be stressed that application for a Government or other scholarship tenable at the University does not take the place of application to the University for admission. However, prospective applicants need not wait until they are assured of a scholarship before applying for admission to the University; the two applications can go forward in parallel. Similarly, students are free to simultaneously apply to other universities or educational institutions. For the admission application to be processed, all the forms and other requirements outlined in the Admission Regulations must be submitted.

Fees and Scholarships

It should be noted that statutory fees, and expenses do not include the costs of books, notebooks, stationery, personal laboratory equipment, medical attention, repair of clothes, dry-cleaning and living expenses. The cost of travel to and from the University is entirely the student's responsibility. Many governments are prepared to offer scholarships or grants to prospective students; information about these scholarships should be obtained from the appropriate authority in the country concerned. Some industrial trusts and corporations also offer awards, usually through the appropriate government, and information about these should be sought accordingly. Although every effort will be made to ensure that no student is deprived of the opportunity for study by lack of money, acceptance by the University does not imply that a scholarship is available.

Bank Payments and Procedures

1. Existing Students

1.1 University students may pay fees at any branch of First National Bank of Botswana to University of Botswana bank account number 57110069096. To pay into this account a University student needs a valid student ID. The University accounting system has been interfaced with that of the bank so that immediately upon payment a student will be un-blocked for registration at the University. After paying your fees you may proceed directly to your Faculty for academic registration [i.e. University students who pay fees in this manner need not queue again at Financial Services department for financial registration/clearance].

For international payments, students can pay into our Standard Chartered Bank Account details of which are as follows:

Account Name: University of Botswana
Account Number: 0100110109600
Branch code: 662167
Swift code: SCHBBWGX

Copies of proof of payment, (with full student names and student number noted on them) must immediately be sent to the attention Manager Student debtors at fax

number 00 267 3959 390 or e-mailed to Studentpayments@mopipi.ub.bw

4.472 Penalties for Infringement of Examination Regulations

All candidates will be assumed to have read the above Regulations. The following steps will be taken to impose penalties on any candidate who infringes upon examination regulations.

- i) Any candidate who is considered by the invigilator to be committing an infringement of the rules will be reported and appropriate action taken. The supervisor has the power to dismiss a candidate from the room and compel him/her to surrender the script if deemed to be guilty of serious misconduct.
- ii) In all cases of misconduct, the candidate will be warned that his/her conduct will be reported and that the decision as to whether the work will be accepted or disciplinary action taken rests with the authorities.
- iii) When it is determined that the student has committed misconduct calculated to affect improper examination performance:

- a) He/she may be refused credit for any courses or examinations completed or attempted;
- b) The results may be withheld;
- c) He/she may be suspended from writing the examinations;
- d) He/she may be dismissed from the University for repeated misconduct;
- iv) A candidate who wishes to appeal shall follow the procedure set out in the Disciplinary Regulations.

Academic Appeals and Procedures

A. Continuous Assessment

Appeals student may request a review of continuous assessment mark(s) and decisions during the course of the year.

Steps in the Process of an Assessment Appeal

1. Course Instructor

First discuss concern with the course instructor promptly upon receipt of the assessment mark or decision in an attempt to resolve any differences. The student has the right to take the matter directly to the Head of Department if need be.

2. Department/Programme

If the complaint has not been satisfactorily resolved at Step 1, the student may approach the Head of Department (or Dean if the Head of Department is the instructor, or DVC/AA if the Faculty/School Dean is the instructor) for review, mediation or resolution. The student should attach to the written complaint all relevant evidence as is available to substantiate the complaint. The Head of Department shall investigate and may endeavour to resolve the matter, or may seek further advice/ recommendation from the Departmental Board or other persons as he/she thinks fit. The Head of Department may direct that corrective action be taken when justified.

3. Faculty/School

If the complaint is not resolved at Step 2, either the Head of Department or the student will refer the written complaint to the Dean of the Faculty/School for investigation, review and resolution. The Dean will review the appeal, discuss with the student, the Head of Department, and any other persons concerned, and may refer it to the Faculty/School Executive for further advice/ recommendation. The Dean may direct that corrective action be taken when justified. He/ she will report his/her decision to the student and the instructor.

4. Academic Appeals Committee

Should the complaint not be satisfactorily resolved at Step 3, either the student or Dean may refer the written appeal to the Senate Academic Appeals Committee for review and resolution. The Committee will review the appeal and the appeal decisions made at earlier steps of the appeals process. The Committee shall determine its own procedure. The student(s) and the instructor concerned may attend the hearings to hear and answer allegations and to present their arguments. The Committee shall not itself re-mark/re-grade the continuous assessment script but shall direct that this be independently done where appropriate. The Committee's decision shall be binding on all parties, may not be appealed, and takes effect when issued.

5. The Committee may refuse to proceed with an appeal or complaint if it concludes that the appeal or complaint is vexatious or malicious.
6. Appeals which challenge the professional academic judgement of individual examiners or Boards of Examiners on the examination performance of students will not be permitted.
7. Victimisation or harassment of students who lodge complaints is prohibited. Procedures relating to Sexual Harassment are dealt with separately below.
8. No fee shall be paid.

B. Examination Appeals

Students may request a review of their examination marks, results and academic decisions. However, examination appeals against externally moderated examination marks will not normally be considered unless evidence exists that errors/omissions/irregularities had occurred or new evidence exists which necessitates a review of the mark, result or decision.

Appeals are heard on the following grounds:

1. New evidence: i.e. evidence of circumstances affecting the student's examination performance that, through no fault of the student, could not reasonably have been presented at an earlier date.
2. Procedural or other irregularities in the conduct of the examination.

3. Procedural irregularities in the marking of the examination, e.g. evidence that the scripts have been insufficiently or incorrectly marked.
4. Evidence of prejudice or bias on the part of one or more examiners.
5. Inappropriate advice from members of administrative or academic staff on matters affecting the student's examination candidature or performance.

The student and instructor may enlist the aid of a neutral third party (e.g. counselor, academic advisor) to assist.

For further details of the appeals procedure, please contact the:
 Department of Academic Services,
 Tel: (+267) 355 2018/2016 Fax: (+267) 3585 103.
 University of Botswana

6. Failure of the University to implement its agreed procedures and regulations.

Grounds for appeal must be specific. Reasons such as 'I deserved a better grade', or 'I thought I did better' are unclear and unhelpful. Appeals which challenge the professional academic judgment of examiners on the student's examination performance will not be considered. Appeals or representations are allowed as a way of ensuring that as far as possible all relevant circumstances surrounding examination performance are brought to light and taken into account in formulating results and decisions. Appeals should be lodged with the relevant Head of Department. Examination appeals must state clearly the grounds for appeal and should include all relevant information. The burden of proof is on the student, and the written appeal should state and support with available evidence the grounds for appeal. The Examinations Appeals Committee will consider the details of the appeal and decide whether the appeal is valid, and if so, what relief should be provided. The Committee does not usually hold hearings. The examination script may be re-marked only if the Committee so directs; there is no automatic re-marking/ re-grading of scripts. However, for all appeals and queries received from students, the marks and/or results will be checked for errors, omissions and conformity with regulations, and a correction made where necessary. The Committee's decision is final and takes effect when issued. Examination scripts and the marks awarded for individual examination questions/answers are not shown to students.

Procedure for Handling Queries and Appeals on Final Course Grades and Marks

1. Students shall submit queries and appeals within one month from the official date of the publication of Cumulative GPAs and academic results. Queries and appeals received after the deadline date will not be processed except where the delay was caused by factors reasonably beyond the student's control.
2. If a student feels that a final course grade/mark is inaccurate, the student may lodge a query with the Head of the Academic Department/Unit concerned. The Examiner(s) will check the continuous assessment and examination marks for errors and omissions, and if an error is detected, submit to the Head of Department a change of course grade or mark in the approved Course Grade/Mark Change Form.
3. If the student feels that a final course grade/mark was unfairly assigned, the student may submit a written appeal of the grade/mark to the Head of the Department (HoD) concerned. The HoD shall process the appeal within one week of receipt of the written appeal.
4. If the complaint is not resolved, the HoD shall forward the student's appeal to the Deputy Dean. The Deputy Dean shall process the appeal within one week of receipt of the written appeal.
5. If the complaint is not resolved, the Deputy Dean shall forward the student's appeal to the Secretary of the Senate Academic Appeals Committee. The Committee shall process the appeal within two weeks of receipt of the written appeal and its decision is final.
6. The HoD or Deputy Dean or Appeals Committee may refuse or accept the appeal. If the appeal is accepted, the appellant's examination script shall be re-marked. The original marker or a second marker shall be asked to review the examination script along with a representative sample of all the examination scripts in the course. The appellant's scrip shall be identifiable. If the review leads to a lower grade/mark the original grade/mark shall not be lowered.

C. Complaints Relating to Individual Course Instructors

A student who has a grievance relating to a course instructor (e.g. unsatisfactory teaching, unsatisfactory relationship with the course instructor) may follow these steps:

1. Raise concern with the course instructor as soon as the problem or difficulty arises.
 Most grievances can be resolved amicably and quickly in this manner. The student may take the matter directly to the Head of Department if need be.
2. Concerns related to an instructor that cannot be resolved at Step 1 should be discussed with the Head of Department (or Faculty Dean, if the Department Head is the instructor, or DVC/AA if the Dean is instructor).
3. If the complaint is not resolved at Step 2 above, the student may follow the Steps as in 1.3 through 1.5 under Section 1 above. The complaint review process is accomplished in a collegial nonjudicial atmosphere rather than an adversarial one and allows the parties involved to participate as appropriate. Complaints must be raised and resolved promptly and as soon as they arise during the course of the year.

Mathematics and Science Education

1.0.2 The Department of Mathematics and Science Education provides undergraduate and graduate programmes in computer studies, mathematics and science. It offers a wide range of courses including: The theory and practice of teaching school computer studies, mathematics and science education; curriculum development, classroom research and evaluation; contemporary issues in computer, mathematics and science; issues in computer, mathematics and science pedagogical content knowledge; the integration of ICT into the teaching-learning processes; and the philosophy and psychology of computer, mathematics and science teaching. The programmes of study are the Bachelor of Education (Science), Master of Education, MPhil, and PhD. Plans are underway to introduce M.Ed in Computer Studies, Mphil and Phd in the same area. The department offers service courses for Bachelor of Education (Secondary) and Post Graduate Diploma in Education (PGDE). Also the department has an in-service unit that provides workshops and seminars to school teachers and supports schools to strengthen the structure of computer, mathematics and science departments in these schools.

1.0.4 The Bachelor of Education Programme in Science commenced in 1984 and now prepares graduates to become Computer Studies, Mathematics and Science (Biology, Chemistry and Physics) teachers.

1.0.5 The Bachelor of Education Programme in Secondary Education was designed to accommodate both the diploma of the Department and the Colleges of Education. It began in 1996 and in 1998 replaced the Bachelor of Education Programme in Science Education, which began in 1987. The PGDE is offered as a teaching qualification to holders of Bachelor of Science Degrees to prepare aspiring Computer Studies, Mathematics and Science teachers for their teaching careers.

1.0.6 Optional courses may be taken in other departments by students who have met the appropriate Programme requirements.

1.0.7 Courses are assessed in a variety of ways, including written assignments, tests and projects as approved by the Senate.

1.0.8 The Department reserves the right not to offer optional courses in a given semester.

1.1 Bachelor of Education Degree in Science

The aim of the Bachelor of Education Combined Major Degree Programme in Science is to significantly contribute, in collaboration with the Faculty of Science, to national manpower development by producing high quality Computer Studies, Mathematics and Science teachers for the national education sector. Subject to the provisions of General Regulations 00.0 and 20.00 and to the Faculty of Education Special Regulations, the following Special Regulations of the Department of Mathematics and Science shall apply:

Introduction to Planning and the Built Environment offers an introduction to the complexities of contemporary planning. The course will open with a discourse on the diverse and sometimes conflicting definitions of planning. It will then proceed on a journey through the dynamic sub-discipline foci encompassed in planning theory and practice. The course content will draw from both practice and theory, bringing the two together by way of lectures, seminars, a field trip, guest speakers and varied assessment. This journey will conclude with a return to the fundamental questions raised at the start of course – that of the conflicting definitions of contemporary planning.

HEALTH SCIENCES

Academic Organisational Structure

Organisationally, the Faculty of Health Sciences operates under schools and currently comprises the following entities:

- School of Allied Health Professions
- School of Nursing
- School of Public Health

The principal activity of the Faculty in the next few years will be to engage in strategic planning that will embrace:

- Affirmation/re-affirmation of the kind(s) and number(s) of university-trained and educated human resources for health that Botswana will need and the role(s) they are to play in the health system of the future;
- Working with all stakeholders to arrive at a Faculty strategic plan that includes a statement of the vision, mission, values, goals and objectives of the Faculty as part of a national teaching health system;
- Designing, developing, and approving high quality and internationally accredited curricula that are appropriate to the Botswana and African context, and are aligned with the University Learning and Teaching policy,
- Promote intra-faculty teaching and learning and articulate with programme offerings within Botswana and SADC;
- Identification of relevant and high-priority areas of research and research training in the health sciences that will contribute to improved national and regional human health and welfare;
- Ensuring that the faculty spearheads the drive for excellence in health professional service delivery.

This agenda will call for a holistic and innovative approach to the review of the learning and teaching, research and research training and professional service and existing programmes of the faculty.

To do this within an appropriate governance framework, and in consultation with all interested parties is expected to result in the University approving the establishment of interim arrangements to ensure a smooth transition from the current structures, within and outside the University, to those that shall obtain under the aegis of a Faculty of Health Sciences that is embedded in a national teaching health system.

HUMANITIES

Although for administrative purposes the Departments of Environmental Science and Sociology are located in other Faculties, they are considered academically to be part of the Faculty of Humanities. In fact, a considerable number of students who major in Environmental Science and Sociology are Humanities students. With the flexibility that is afforded by semesterised courses, more departments in the Faculties of Business and Science will become accessible to Humanities students, especially through cross-faculty programmes. With the new focus on educating specialists in a generalist way, the Faculty values a well-rounded education with the requisite ICT and numeracy skills. The Faculty of Humanities concentrates mainly on those studies that specialise in understanding human ideas, behaviour, culture and its mediation, with a particular emphasis on humanity in Africa in relation to the rest of the world. This Faculty thus has a prime role to play in the discovery and the appreciation of the heritage and liberal arts of the societies of Africa in general and of southern Africa and Botswana in particular. In this regard, the Faculty of Humanities, through research and teaching in its academic departments, is in a privileged position to effectively contribute to the realization of the Vision and Mission of the University. In addition, the Faculty of Humanities contributes to human resource development by assisting in the training of teachers. The departments in the Faculty provide the content base for secondary school and tertiary level teachers of English, Setswana, French, History/Social Studies, Geography and Religious/Moral Education by offering majors in the Bachelor of Arts, Bachelor of Education and the Masters of Education Degrees in these disciplines. As the Faculty continues to implement the provisions of the Tenth National Development Plan (NDP 10), the semesterised academic programmes, and also plans new programmes within the plan period, it shall simultaneously address the requirements of the Revised National Policy on Education as well as the aspirations of the National Vision 2016. It will also position itself strategically within the plan period processes to face the challenges brought about by diminishing budget allocations and competition for fewer resources.

(a) Admission to the Applied Geophysics Degree Programmes shall be as specified in the Faculty of Science Regulations 23.2.1 and 23.4.

(b) Students who wish to register for Applied Geophysics at Level 200 must have taken and passed Mathematics, Physics, Chemistry and Geology at Level 100.

(c) A student admitted to Level 200 Applied Geophysics who has successfully completed Level 100 Geology courses must comply with the University of Botswana Academic General Regulation 00.311 by taking relevant General Education courses or Elective courses in consultation with the Head of Department.

Award of Degree

To be awarded a Bachelor of Science Degree in Applied Geophysics a candidate must have taken and passed the relevant courses prescribed in section 9 and must satisfy General Academic Regulations 00.85 and 00.9 and Faculty of Science Special Regulation 23.7.

Programme Structure

The Programme is designed in such a manner as to gradually introduce students to the principles of Applied Geophysics in the third year. It is envisaged that at this level, students are sufficiently grounded in the basic theories and principles used in Geophysics and can appreciate all the scientific/practical developments in this field they are likely to encounter. They should have been exposed to adequate field work through the geology field course taken during Level 100 and 200.

The fourth and final year consists of the completion of the Geology and Applied Geophysics courses and emphasis is placed on application of the various geophysical methods in exploration and fieldwork (where the students will be acquainted with the use of various geophysical equipment) which forms a major component of the course.

The courses are also designed to satisfy the required training expected for an applied geophysicist. This will enable graduates of the programme to qualify to be members of professional societies such as the Society of Exploration Geophysicists (SEG).

In the final year students will have the option of choosing either the Mining Geophysics or the Environmental Geophysics Stream, the latter including geotechnical and groundwater studies.

Entry Requirements to the Bachelor of Medicine Bachelor of Surgery (MBBS) programme

There is no direct entry into the Bachelor of Medicine Bachelor of Surgery program at Faculty of Medicine. The only opportunity for an applicant to be considered directly is when they have attained A-levels, BSc year 1 or equivalent be it in Botswana or abroad.

Admission to the Faculty of Medicine

The University of Botswana selects students to enter the medical degree programme in August, over May and June. Students seeking admission must apply immediately when the announcement is made. These students will be selected on the basis of their year one results in BSc, A' level results or equivalent, followed by assessment of their application form, short essay and interviews. Personal and professional behaviours, academic performance and communication skills will be considered in the process. Successful candidates will be immediately enrolled in the Faculty of Medicine MBBS program to begin the Phase One, Problem Based Learning (PBL) Curriculum.

Undergraduate Degree Programme

The undergraduate programme is five years in length and divided into two parts. Part One (Phase 1 of the MBBS program) consists of 2 years in a fully integrated curriculum of basic medical sciences within clinical PBL cases and clinical skills teaching with regular clinical attachments. A 10-week Winter Semester has been added to allow for the greater intensity of medical education and Public Health training. The teaching methodology is based on body systems and includes plenary lectures, PBL within small groups, workshops, with laboratories and clinical skills for practical learning. The curriculum is intended to have a strong focus on the community. It is flexible to meet the needs of both faculty and students, and respond to changing health care demands of the country. Design of the PBL content reflects the health problems and resources of the community.

The second part, or the three subsequent Phase 2 years, requires hospital and clinic rotations in the major disciplines. These experiences are enhanced with an opportunity to explore community services and public health efforts. Phase 2 of the programme consists of years 3-5. The students are exposed to learning in a clinical context that eventually enable them to acquire the competencies for independent practice as graduates of medicine at the end of their internship program. Acquiring most competencies in the clinical years is progressive throughout the undergraduate life. Therefore, the complete phase 2 competencies can only be fully assessed at the end of 5th year.

Special Regulations under Faculty of Medicine for the MBBS Programme

The important requirements to note for students reading for Bachelor of Medicine Bachelor of Surgery (MBBS):

1. One needs to pass Continuous Assessment (CA) to be allowed to sit for the Final Examination.
2. Students are required to score 50% and above in the Final Examination to pass the course.

ASSESSMENT AND ACADEMIC PROGRESSION REGULATIONS

1.0 Regulations guiding assessments in Phase II of the MBBS program

1.1 Senate's General Academic regulations

- The Senate's General Academic regulations of the University of Botswana (modified where necessary to accommodate the peculiarities of assessment in medical education), shall apply to all assessments in phase II.
- All assessments in the phase II of MBBS program shall be blueprinted to the three core themes of the program:
 - Medical and related science
 - Doctor-patient relationship
 - Public Health & Medicine

1.2 Academic year

- The academic year shall comprise 40 teaching weeks, a one week of reading (revision) and two weeks of examination.
- All courses in both phase I and phase II shall be year-long courses and progression decisions shall only be made at the end of the year. There shall be no semester courses. For Phase I, even though some assessments are made at the end of the semester, academic standing is determined at the end of the academic year.

1.3 Attendance

- Attendance of all contact sessions (clinical rotation, PBL, whole class lectures, community placements tutorials and others as may be determined by the department) in all courses in phase II is compulsory. Students are expected to have 100% attendance during their clinical rotation and community programmes. Students who have attended less than 80% of the contact periods in any course (without valid reasons) will not be allowed to participate in the end of year examination in that course and shall be awarded zero mark in that particular examination. They will have to repeat the clinical rotation period in that course and meet up the minimum 80% attendance before being assessed.
- If a student is unable to meet the required minimum of 80% attendance of contact sessions in any course (s) due to exceptional or extenuating circumstances, the candidate may be admitted in the end of year assessment provided that the Dean had been notified in writing (with copies to the Phase II coordinator and Head(s) of department concerned) within 48 hours of the event. Such letter should describe the nature of the circumstance. In all cases, the department(s) concerned should advise on the preparedness of the candidate to sit for the exam or be considered for a special examination.
- If a student has made all the requirements in any course (s), but is unable to sit for the end of year

examination due exceptional or extenuating circumstance (bereavement, ill health or other circumstances that may cause emotional trauma), for which the Dean has been duly notified, the candidate can apply to be considered for a special end of year examination. The special examination must take place before the beginning of the next academic year but not earlier than 48 hours after the student is certified fit to sit for the examination.

- Once a student has sat for the end of year examination, he or she may not afterwards apply for a special examination on the basis of unforeseen circumstances.

1.4 Progression from year to year.

A student must pass all the components of the exam (written, clinical, etc) and meet all the requirements for that year in all courses before progressing to the next year of study. There shall be no carry over. The pass mark shall be 50%. All high stakes examinations shall undergo minimum standardization before being administered, or during the examination in case of the clinical component.

1.5 Minimum standardization requirements (standard setting)

- According to the Faculty of Medicine Regulations on assessment, both internal and external moderation of assessment tasks shall occur.
- All written examination questions shall be internally moderated by a panel of examiners selected from the clinical specialties. This panel will carry out a pre-assessment moderation of all the questions not later than 4 weeks before the date of the examination and determine the level of score that an average student will be able to achieve and set a pass mark as such for that exam. This will then become the minimum 50% pass mark requirement of the University. All internally moderated questions must also be externally moderated by an external examiner (in each course) appointed by the Dean, FOM on behalf of Senate, following departmental recommendation and endorsement of the Board. All HODs must ensure that their internally moderated questions are sent to their appointed external moderators not later than 6 weeks before the commencement of the examination. Such an external examiner shall serve for three consecutive years and shall not be re-appointed. The function of the external examiner shall be limited to the moderation of questions in all high stakes examination in year 3. In year 4 and the final year however, the external examiner shall moderate the questions and be invited to examine in the clinical component of the examination

1.6 Assessment

1.6.1 Continuous Assessment

Assessment of students' progress shall be on a continuous basis. Formative assessment shall take place informally all through the clinical rotation period in all the courses. Clinical instructors are expected to monitor each student's performance in their courses through various methods such as case presentations, PBL sessions, directly observed clinical and procedural skills, etc and promptly give feedback to the students on their level of performances. The summative continuous assessment shall carry 40% of the year mark in each course. The following shall form the components to be assessed using the log book:

• **Clerking and presentation of patients:** Each student in the firm must clerk and present a minimum of one case per week (assigned by the clinical instructor(s)). This shall carry 10% of the continuous assessment mark.

• **Directly Observed Clinical and Procedural Skills (DOCPS):** This shall consist of mini-Cexs and clinical procedures involving generic skills. Each student must complete the number of procedures outlined in the department's log book. The procedures shall be categorized into those observed (O), assisted in (A) or performed (P) by the student. This must be dated and signed by the supervising clinician. Students are expected to carry out 100% of the listed procedures to be logged in as determined by the department before they can sit for the examination. This shall carry 10% of the continuous assessment mark.

• **Formulation of management plan and evidence based decision making:** This shall follow the student's patient presentations and will involve requisition of Laboratory or imaging procedures to aid the diagnosis/management and interpretation of the same by the student etc. In all cases, the student is expected to follow-up the patient until discharge or demise of the patient. In the latter case, if an autopsy is requested the student must attend the autopsy session and write down the findings as part of the documentation of the patient's illness. This shall carry 10% of the continuous assessment mark.

• **Engagement with the PBL process:** All students are to be assessed during their PBL session for attendance, contribution and reflective ability on each case. This shall carry 10% of the continuous assessment mark.

All summative continuous assessment (CA) marks must be ready and be forwarded to the phase II coordinator not later than one week after the rotation. The Board shall consider and formally issue progress reports on each student during the following monthly meeting of the Board after each rotation.

A student is expected to have a minimum mark of (50%) in the continuous assessment (20 marks out of 40) to be in academic good standing. Any student who fails the continuous assessment (course marks) shall not be admitted to the end of year examination. The format of continuous assessment shall be the same for all the clinical years. The continuous assessment in Public Health Medicine will consist of student presentations on the field activity (10%), personal reflection (10%) and report on the community project (20%).

The Basic pharmacology block in year 3 and the Forensic Medicine and Toxicology block in year 4 shall be assessed 100% by CA. A student who fails to pass the CA in these blocks shall be requested to re-take the test in the coming year. Although failing any of these blocks will not hinder students from progressing to the next year of study, passing them is a requirement before graduation.

Similarly, the Elective block in year 4 shall be graded as pass or fail. At the end of the 8-week elective block, students are expected to submit a 1500 words scientific report on the project and/or what they studied during the elective period under the guidance of a designated supervisor (s). It is a requirement to pass the elective block before graduation. A formal report from the student's supervisor shall be submitted to the School of Medicine.

1.6.2 End of year Examination

There shall be an end of year examination which shall carry 60% of the year mark. Progression decisions on

each student shall only be made at the end of the year. There shall be written and clinical components of the examination in all the core clinical specialties except in year 3 in which the end of year examination shall consist of two written papers. There shall be no structured oral (viva voce) examination.

In year 3, the end of year examination shall consist of the following components:

1.6.2(i) Written examination:

This shall normally hold at the end of the academic year. It shall be administered in each course as follows:

- a. Knowledge and understanding paper: comprising MCQs and EMIs worth 90marks (1hour 30 mins) in each course.
- b. Key clinical features: short answer questions around clinical presentations worth 90 marks (1 hour 30 mins)

Each component of the examination must be passed. There shall be no compensation of marks from one component to the other. All examination questions in all the courses shall be externally moderated by external examiners appointed by the Senate of the University of Botswana.

In year 4, the following shall form the components of the examination:

In year 4, the following shall form the components of the examination:

1.6.2 (ii) Written Examination

This shall normally hold at the end of the academic year. There shall be one written paper principally assessing knowledge and understanding. It shall be a 2 -hour paper comprising of MCQs, EMIs and SAQs. This shall carry 20% of the year mark. The overall mark allocation to this paper is 120.

All examination questions shall be externally moderated by external examiners appointed by the Senate of the University of Botswana.

1.6.2(iii) Clinical Examination

This shall normally be in the form of objective structured clinical examination (OSCE). There shall be a minimum (16 OSCE stations in all) for this part of the examination. The time allocation to each station must be equal and it will range from a minimum of 10 minutes to a maximum of 15 minutes per station. This shall carry 40% of the year mark. OSCE stations assessing communication skills and professionalism must be included. All clinical examination shall be externally moderated by the external examiners appointed by the Senate of the University of Botswana. There shall be one external examiner for each course.

In **Public Health Medicine**, the following shall be the format of assessment:

1.6.2 (IV) Continuous assessment

- Personal reflection (10%)
- Presentations (10%)
- Project report (20%)

1.6.2 (V) End of year examination in Public Health

• Shall consist of a 2-hour paper as for the other courses above but it shall carry 60% of the year mark. The Examination paper shall be externally moderated.

Each component of the assessment must be passed. There shall be no compensation of marks from one to the other. Students who fail to pass their CAs may not be admitted to the end of year examination.

In year 5, there shall be a final (exit) examination at the end of the academic year. Both the written and clinical components of the examination shall take place at the end of the year in all courses.

Both the written and the clinical components of the examination shall be subjected to external moderation.

The learning framework in the final year is largely contact with a wide variety of patients through an "assistant intern scheme". The PBL process continues but the emphasis changes to consider broader issues of patient management. Apart from the PBL sessions (which should as much as possible be on real patients), the tutor's role should concentrate on observation of and feedback on the student-patient encounter rather than on transfer of factual information which the students can find out for themselves with appropriate guidance. Students must keep a record of skills they have acquired which has been signed off by a senior member of staff.

1.6.2 (VI) Assessment

- a. The Continuous assessment shall be of similar format as for year 4 and it shall carry 40% of the year mark.
- b. Final (exit) examination. This shall hold at the end of the academic year and shall consist of the following components:

- i. Knowledge and understanding paper which shall tests elements across the biomedical (Phase I) and clinical sciences. The questions shall be a mixture of MCQs and EMIs. It shall be worth 150 marks to be written in 2 hours 30 minutes. This shall carry 20% of the year mark.

- ii. Integrated Clinical Management Paper (ICMP): this shall consist of short answer questions oriented around common patient management problems including appropriate investigations, prescribing and preventive strategies. There shall be 20 questions in all drawn from the 5 courses in year 5. The paper shall last 2 hours 30 minutes. This shall carry 20% of the year mark.

- iii. Final Clinical Practice Examination (FCPE): This shall be in the form of OSCE. There shall be up to 24 OSCE stations altogether for this component of the examination. Each shall be for a minimum of 10 minutes and a maximum of 15 minutes. Each station must be of the same time allocation. The FCPE shall carry 40% of the year mark. Students are expected to obtain a satisfactory grade at each station before they can progress to graduation. OSCE stations assessing Ethics, communication skills and Professionalism must be included.

1.7.0 Re-assessment opportunity

1.7.1 Supplementary Examination

Subject to the Senate General regulations on assessment (section 00.95), and the Faculty of Medicine Special Regulations on assessment in the MBBS program, supplementary examination shall hold within six (6) weeks after the end of year examination result has been published and in any case, not later than the 3rd week of July. The six weeks' time shall be a remediation period for the students who qualify for supplementary examination at the end of year 3 and 4. In the final

(exit examination) at the end of year 5, a reassessment opportunity is only available 6 months after the final exit examination results have been published. The 6 months period shall be a remediation time for students who qualify for supplementary examination. Reassessment is only available for up to two failed courses.

The following regulations shall apply to students who fail to obtain pass marks at the first assessment opportunity:

1.7.2 A student who fails to obtain a pass mark in up to two courses (40% of attempted year credits), shall apply for supplementary examination in the failed courses. The mark for the reassessed courses shall be recorded as the minimum required for the student to pass if the student scores higher than this. However, if a student obtains a lower mark after being reassessed, the initial mark obtained in the end of year examination shall be recorded as the final mark. The course marks (CA) for any student supplementing a course shall count in the final computation of the year mark.

1.7.3 A student who supplements a course(s) and fails to obtain a pass mark shall repeat the year of study. Such a student must repeat all the courses for that year and meets all requirements for that year before being admitted to the end of year examination.

1.7.4 A student who fails to obtain a pass mark at the end of a repeat year shall be discontinued from the MBBS programme. A student who is discontinued from the MBBS programme shall not be eligible for re-admission into the programme. Such a student may apply to another programme for which the student qualifies.

1.7.5 A student who fails up to 3 or more courses in the year (up to 50% or more of the year attempted credits), shall repeat the year of study. Such a student must repeat all the courses for the year and meet all the requirements including continuous assessment before being admitted to the end of the repeat year examination. Any student who fails to obtain a pass mark at the end of the repeat year shall be treated as in (1.7.4) above.

1.7.6 Any student who repeats the final year and fails to obtain a pass mark shall be discontinued from the MBBS program as in 1.7.4 above.

1.7.7 Notwithstanding the forgoing Faculty of Medicine special regulations on assessment in phase II of the MBBS programme, Senate has the power to overrule any of the regulations. In such cases, the Senate General regulations on assessment shall supersede the provisions of any or all sections of the regulations set forth in this document.
