Historical Note

The opening of the University of Basutoland, Bechuanaland and Swaziland (UBBS) on January 1st 1964 was the outcome of an agreement reached in mid-1962 between the High Commission Territories and the Oblate of Mary Immaculate of Pius XII Catholic University, Roma, Lesotho. Pius XII College of Roma, 35 kilometres from Maseru, was itself an outcome of the desire for an institution of higher learning in Francistown, Lobatse and Serowe. Teaching Funds were obtained from the United States, British, Canada, Danish and Netherlands administrations. Funds were allocated to the University College of Gaborone, and at Kwaluseni adjacent to the national high school of Matsapha.

In Botswana and Swaziland there were to be campuses respectively within the capital Gaborone, and at Roma, dedicated to maintaining and intensifying service to the ideals previously laid out for UBBS. The formal inauguration of the University of Botswana was performed on 23rd October 1982 by His Excellency Sir Ketumile Masire, President of the Republic of Botswana. The University of Botswana and Swaziland continued to cooperate for a further six months to 31 December 1982 for the purpose of examining and awarding degrees, diplomas and certificates. In terms of an agreement between the Governments of Botswana and Swaziland, the National Universities of Botswana and Swaziland were to continue to exchange students and to cooperate in certain areas and to that end a consultative machinery set up to advise on how best to cooperate.
development and maintenance of the University. But as a mainly policy-making body the Council cannot, and should not, be engaged in the day-to-day administration of the University. Clearly, it could not carry out efficiently all its wide responsibilities by itself. On academic matters it consults the Senate; on many other matters, while retaining overall control and responsibility, it delegates much of the detailed work to the officers and committees.

The Senate
The chief academic authority of the University is the Senate, whose membership includes the VC, Deans, Faculty Deans, faculty representatives and Heads of academic support units as well as student representatives. Under the Council, the Senate has the responsibility for the general control and direction of teaching and research activities, examinations, the conferment of degrees and award of diplomas and certificates.

Much of its statutory authority is exercised through its approval and, from time to time, amendment of various sets of academic regulations, all of which are published for general information in the later sections of this Calendar. They include general and special academic regulations, admissions and examination procedures, degree structures, programmes of study, syllabuses, library regulations, etcetera. Regulations in any organisation may appear to restrict freedom of action, but are necessary for the orderly conduct of affairs. Additionally, in a University context, the regulations are the means by which the Senate ensures that the academic standards and quality of teaching are acceptable not only to the University and the nation, but also to the wider academic community of the world. Senate also delegates much of its detailed work to committees, reviewing the recommendations they bring forward for its approval.

Faculties and Departments
Below the level of the Vice Chancellor's office, the University is divided broadly into three types of specialised work: academic affairs, finance and administration, and student affairs. The academic side is represented by the Senate, Faculties, Schools, Departments and Institutes. Specialisation and the best use of staff expertise are achieved on the basis of the division of the academic areas into departments. Each department has a special focus, involving it in teaching and research in particular subjects or disciplines. These departments are responsible for the day-to-day teaching and research work of the University, and they formulate the programmes of study. A number of departments and similar or related disciplines are grouped together to constitute a Faculty. At present there are eight established faculties: Business, Education, Engineering and Technology, Humanities, Science, Social Sciences, Health Sciences, Medicine and a School of Graduate Studies. The Faculty of Health Sciences was formally established on 1 April 2006. Currently, the Faculty of Medicine is the newest faculty and it includes the School of Nursing, the School of Allied Health Professions and the School of Public Health. In general, departments in the same faculty work closely together in offering Degree, Diploma and Certificate Programmes. In many cases there is a similar cooperation between Faculties. Faculties are headed by Deans, who represent the Faculty on other bodies and who have general responsibility for coordinating the work of the Faculty. Faculties work through their Faculty Boards and a variety of committees established by the Boards. Proposals from departments are brought to Faculty Boards for discussion and may then be submitted to Senate and, when necessary, to Council. Decisions and directions are then transmitted back to departments through the same channels.

Student Financial Information
Student Financial Procedures
2.21 Reporting to the Finance Office is an integral part of registration; until financial clearance has been obtained from the Finance Office, registration will be deemed to be incomplete.

2.22 All fees must be paid by the first day of the semester. Sponsored students have to produce satisfactory evidence of the award of sponsorship.

2.23 Where a scholarship includes a student's personal allowance, the University may advance up to one half of it, at its discretion. If a cherub is not honored, a student may be asked to cancel registration immediately.

2.24 Scholarships administered by the University shall be awarded on the understanding that any monies received by the University and disbursed to or on behalf of the student, will be repayable by the student, should he or she withdraw during the course of the academic year without permission of the University.

2.25 Students who damage University property or equipment will be charged the cost of repair or replacement of the item(s). An annual caution fee is held to cover any such charges which are not otherwise settled upon demand. Before registering for a subsequent academic session, the caution fee must be restored. Unless an account for damage is settled immediately a student may be requested to withdraw.

2.26 Should a student leave the University without having paid the prescribed fees, including fines due, or without returning any library books, the academic results and transcripts and/or final certification for which a student is otherwise qualified, shall be withheld until such fees, library books or University property have been recovered.

2.27 Any registered student who decides to withdraw from the University must give notice of his/her intention to do so in writing to the relevant Head of Department and Dean's Office. All students shall be eligible to get 100% refund if they withdraw within the first 30 days each semester. Any registered student who withdraws from the University after the first 30 days shall be eligible for only 50% of tuition fee refund up to mid semester and any student withdrawing from the University after mid semester break of each semester shall not be eligible for any refund of fees.

2.28 Once a student has accepted an offer to reside in any hostel and has been duly registered for accommodation, he/she shall remain so registered for the rest of the semester. Application or request to move out of the hostel during the semester shall not be accepted to. Where a student moves out of the hostel on their own accord no refund of accommodation fees shall be made irrespective of the period of hostel occupation.

Where a student is allocated hostel space during the course of the semester, accommodation fees shall be charged on a pro rata basis.

Student Admissions
Prospective undergraduate applicants, are to access the University of Botswana website wwwubbw, to complete and submit the application form on-line. For graduate programmes, admission applications are made direct to The Dean, School of Graduate Studies. It must be stressed that application for a Government or other scholarship tenable at the University does not take the place of application to the University for admission. However, prospective applicants need not wait until they are assured of a scholarship before applying for admission to the University; the two applications can go forward in parallel. Similarly, students are free to simultaneously apply to other universities or educational institutions. For the admission application to be processed, all the forms and other requirements outlined in the Admission Regulations must be submitted.

Fees and Scholarships
It should be noted that statutory fees, and expenses do not include the costs of books, notebooks, stationery, personal laboratory equipment, medical attention, repair of clothes, dry-cleaning and living expenses. The cost of travel to and from the University is entirely the student's responsibility. Many governments are prepared to offer scholarships or grants to prospective students; information about these scholarships should be obtained from the appropriate authorities in the country concerned. Some industrial trusts and corporations also offer awards, usually through the appropriate government, and information about these should be sought accordingly. Although every effort will be made to ensure that no student is deprived of the opportunity for study by lack of money, acceptance by the University does not imply that a scholarship is available.

Bank Payments and Procedures
1. Existing Students
1.1 University students may pay fees at any branch of First National Bank of Botswana to University of Botswana bank account number 57110069096. To pay into this account a University student needs a valid student ID. The University accounting system has been interfaced with that of the bank so that immediately upon payment a student will be un-blocked for registration at the University. After paying your fees you may proceed directly to your Faculty for academic registration (i.e. University students who pay fees in this manner need not queue again at Financial Services department for financial registration/clearance).

For international payments, students can pay into our Standard Chartered Bank Account details of which are as follows:

Account Name: University of Botswana
Account Number: 010011010960
Branch code: 682167
Swift code: SCBWBWOS

Copies of proof of payment, (with full student names and student number noted on them) must immediately be sent to the attention Manager Student debtors at fax
1.2.1 Unless other specific instructions are given, applications are availed, completed and submitted on line through the “STUDY AT UB” link on the University of Botswana Website: www.ub.bw

   v) Application fee receipt

1.2.3 When submitting the application form online, the applicant must upload the receipt for non-refundable application fee.

1.2.4 Applications will not be considered until the University has received the application form, relevant academic transcript(s) and certificate(s), application fee receipt and Omang/Passport.

1.2.5 In addition, an applicant who has attended another university or other postsecondary institution must submit a certificate of good conduct, and a transcript, duly signed by the competent officer of the issuing University.

1.2.6 Unless an applicant is notified to the contrary, the closing date for the submission of application forms and accompanying documents will be the last working day of March immediately preceding the commencement of the academic year for which application is made. 1.273 On receipt of the completed application forms, the Dean of the School of Graduate Studies shall send one copy to the relevant Head of Department who shall submit his/her recommendation to the Departmental Board for consideration. The Board shall in turn forward the application with its recommendation to Senate via the Graduate Studies Board.

1.274 Permission to pursue a graduate degree programme as a part-time student shall be granted only to persons who can show that they are able to devote a reasonable proportion of their time to the work prescribed.

1.275 Registration for Master’s Degree programmes by coursework and dissertation shall normally take place at the beginning of the first semester of each academic year but may, in special circumstances, and on the recommendation by the Graduate Studies Board, take place at the beginning of the semester following that in which the application is approved by the Senate.

1.276 MPhil and PhD applicants may be accepted and registered anytime during the Academic Year with permission of the relevant department/unit.

1.3 Notification of Acceptance

1.31 The Admissions Office for undergraduate applicants and the School of Graduate Studies for graduate applicants shall notify each applicant whether or not he/she has been accepted for admission to the University.

1.32 No applicant should come to the University of Botswana unless he or she has received a formal offer of admission.

1.4 Conditions of Acceptance

1.41 Acceptance of an applicant by the University of Botswana shall be on the understanding that the applicant undertakes to be bound by and to observe the policies and regulations of the University.

1.42 Academic Transcripts

An official transcript will be provided to each student free at the conclusion of his/her studies. Extra copies thereafter shall be issued at a cost to be determined by the University from time to time.

4.1 Misconduct Under the Statute

   ii) Fails to comply with any Statute of the University;
   iii) Willfully destroys, damages, defaces, alters or appropriates to himself/herself any property of the University;

4.2 Disciplinary Procedures
21. Any charge of misconduct shall in the first instance be laid before the Vice Chancellor.

22. (i) The Vice Chancellor may decide the case after taking such advice or seeking such evidence as is deemed desirable or may refer the case for investigation to a sole investigator or may appoint a Disciplinary Committee with such membership as he/she deems appropriate.
   (ii) The Vice Chancellor may forbid such student to attend lectures and/or participate in any student activities whilst the charge against him/her is being investigated.

23. Where the Vice Chancellor refers the case to a sole investigator or appoints a Disciplinary Committee and refers the case to the same Committee, the following procedures shall be followed:
   (i) The student shall be given at least two clear days' notice in writing of the time and place of the hearing and of the nature and substance of the charge against him/her.
   (ii) The Vice Chancellor may designate a member of staff to be present at the hearing to present the case against the student. The sole investigator or the Disciplinary Committee may call witnesses and interrogate them concerning the matters at issue.
   (iii) The hearing before the sole investigator or the Disciplinary Committee shall be conducted in private.
   (iv) The Secretary of the Disciplinary Committee who shall be appointed by the Vice Chancellor, or the sole investigator, as the case may be, shall ensure that an accurate record is kept of all the proceedings and of the evidence pertaining to the case.    (vii) On receipt of a memorandum of appeal, the Vice Chancellor shall bring before the Council, which shall meet in special session if the Chairperson deems it necessary, without delay, a statement of the reasons for the decision, together with a summary of the evidence on which that decision is based, and the student's written memorandum of appeal. The case shall then be decided by the Council on the basis of the material thus presented.

   (viii) Such appeals may be considered by the whole Council or a Committee of not less than three members appointed by the Chairperson for the purpose. Council or its Committee may make its decision on the basis of the minutes or records of any previous hearing and students shall be given seven clear days' notice of the day and time when the appeal will be heard and, in any case in which oral representations of any kind are heard, shall be given the opportunity to hear and cross examine any person making such representations.

   (x) The decision of Council shall be final.

4.3 Criminal Proceedings
31. A finding of guilt or an acquittal in a criminal court shall not preclude proceedings against a student in respect of the same incident, but any sentence or order pronounced shall be taken into account in the imposition of any penalty. Further, the finding of a criminal court in respect of any incident which is the subject of proceedings against a student, may be used in evidence in those proceedings.

4.46 Entry into the Examination Room
Candidates will be told when they can enter the examination room and silence must be observed on entry and whilst in the examination room.
4.461 Seating Arrangements in the Examination Room
Invigilators and exam assistants will guide candidates to their seat.

4.462 Special Arrangements
Candidates who have a disability or suffer from any illness or condition that will require special examination arrangements should inform the Faculty office well in advance. Where feasible, special examination arrangements will be made.

4.463 Procedures During the Examination
Candidates must immediately on taking their examination seats fill in the attendance slip provided. Answer books and other requisite stationery will be provided. Candidates should carefully read the instructions on the front cover of the answer books and then enter their candidate's ID number and other details required. No part of the book may be torn off and all books used must be left on the desks. Rough work must be done in the answer book and should be crossed out to show that it is not part of the answer.

4.464 Starting the Examination
You will be told by the supervisor when you can start the examination and you should not look at the examination question paper before you are told to do so.

4.465 Late Arrival
Candidates who are more than one hour late will not be admitted into the examination room. Candidates who arrive late will not be allowed extra time to complete the examination.

4.466 Examination Reading Time
On being told to start reading, candidates will check that the question paper is the correct one; all questions are legible and all pages are attached. Discrepancies must be reported to the invigilator for attention.

4.467 Temporary Withdrawal
A candidate leaving the examination room temporarily for personal reasons will be accompanied by an invigilator or other authorised person. (NB: Smoking is not considered a suitable reason for leaving the examination room.) The candidate will not take the question paper, answer book(s) and other materials and must not consult or attempt to consult any materials or persons outside the room that may assist him/her in writing the examination.

4.468 Leaving the Examination Room
Candidates may not leave the examination room during the first hour of the examination session unless they feel unwell. Candidates must also not leave during the last ten minutes of the examination and must remain seated until all the examination scripts have been collected and checked by the invigilators. If a candidate has completed his/her paper before the specified time and wishes to leave, he/she must do so as quietly as possible, so as not to disturb the other candidates. Such a candidate will not be allowed to re-enter the examination room. Permission to leave at any time must be requested from the supervisor.

4.469 Illness During Examination
Candidates who fall ill during the examination should inform the supervisor or invigilator who shall act or advise as appropriate.

4.470 Misconduct
The following will be construed as misconduct in an examination:

a) Taking into the examination room, or possessing or using whilst in that room any unauthorised materials or items. Misconduct is presumed from the fact of possession unless an innocent explanation is obvious or is established by the candidate;

b) Aiding or attempting to aid, obtaining or attempting to obtain aid from another candidate. Misconduct is presumed from the fact of communication unless an innocent explanation is obvious or is established by the candidate;

c) Consulting or trying to consult during the examination any books, notes or other unauthorised materials, or another candidate while temporarily outside the examination room;

d) Impersonating another candidate or allowing oneself to be impersonated;

e) Attempting to influence the examiners or other University officials;

f) Failing to obey or comply with any of the examination regulations, or instructions of the supervisor/invigilator acting within the scope of his/her authority. Such repeated behaviour as may in the view of the supervisor prejudice the performance of other candidates. It should be noted that the supervisor is empowered to discontinue the examination of a candidate suspected of misconduct and to expel him/her from the examination room.

4.471 End of the Examination
Candidates will be told to stop writing at the end of the examination by the supervisor. Candidates in the room should then remain seated until they have filled all the details required on the answer book and the scripts have been collected. It is the responsibility of the candidate to ensure that all the additional loose sheets, charts or papers and supplementary answer books are enclosed in the first answer book. Candidates may not take any examination materials, used or unused, out of the examination room other than:

a) The material they brought into the examination room;

b) The question paper (where permissible).

4.472 Penalties for Infringement of Examination Regulations
All candidates will be assumed to have read the above Regulations. The following steps will be taken to impose penalties on any candidate who infringes upon examination regulations.

i) Any candidate who is considered by the invigilator to be committing an infringement of the rules will be reported and appropriate action taken. The supervisor has the power to dismiss a candidate from the room and compel him/her to surrender the script if deemed to be guilty of serious misconduct.

ii) In all cases of misconduct, the candidate will be warned that his/her conduct will be reported and that the decision as to whether the work will be accepted or disciplinary action taken rests with the authorities.

iii) When it is determined that the student has committed misconduct calculated to affect improper examination performance:

a) He/she may be refused credit for any courses or examinations completed or attempted;

b) The results may be withdrawn;

c) He/she may be suspended from writing the examinations;

d) He/she may be dismissed from the University for repeated misconduct;

iv) A candidate who wishes to appeal shall follow the procedure set out in the Disciplinary Regulations.

Academic Appeals and Procedures

A. Continuous Assessment
Appeals student may request a review of continuous assessment mark(s) and decisions during the course of the year.

Steps in the Process of an Assessment Appeal
1. Course Instructor
First discuss concern with the course instructor promptly upon receipt of the assessment mark or decision in an attempt to resolve any differences. The student has the right to take the matter directly to the Head of Department if need be.

2. Department/Programme
If the complaint has not been satisfactorily resolved at Step 1, the student may approach the Head of Department (or Dean if the Head of Department is the instructor, or DVC/AA if the Faculty/School Dean is the instructor) for review, mediation or resolution. The student should attach to the written complaint all relevant evidence as is available to substantiate the complaint. The Head of Department shall investigate and may endeavour to resolve the matter; or may seek further advice/recommendation from the Departmental Board or other persons as he/she thinks fit. The Head of Department may direct that corrective action be taken when justified.

3. Faculty/School
If the complaint is not resolved at Step 2, either the Head of Department or the student will refer the written complaint to the Dean of the Faculty/School for investigation, review and resolution. The Dean will review the appeal, discuss with the student, the Head of Department, and any other persons concerned, and may refer it to the Faculty/School Executive for further advice/recommendation. The Dean may direct that corrective action be taken when justified. He/she will report his/her decision to the student and the instructor.

4. Academic Appeals Committee
Should the complaint not be satisfactorily resolved at Step 3, either the student or Dean may refer the written appeal to the Senate Academic Appeals Committee for review and resolution. The Committee will review the appeal and the appeal decisions made at earlier steps of the appeals process. The Committee shall determine its own procedure. The student(s) and the instructor concerned may attend the hearings to hear and answer allegations and to present their arguments. The Committee shall not itself re-mark/re-grade the continuous assessment script but shall direct that this be independently done where appropriate. The Committee’s decision shall be binding on all parties, may not be appealed, and takes effect when issued.
5. The Committee may refuse to proceed with an appeal or complaint if it concludes that the appeal or complaint is vexatious or malicious.

6. Appeals which challenge the professional academic judgment of individual examiners or Boards of Examiners on the examination performance of students will not be permitted.

7. Victimisation or harassment of students who lodge complaints is prohibited. Procedures relating to Sexual Harassment are dealt with separately below.

8. No fee shall be paid.

B. Examination Appeals

Students may request a review of their examination marks, results and academic decisions. However, examination appeals against externally moderated examination marks will not normally be considered unless evidence exists that errors/omissions/irregularities had occurred or new evidence exists which necessitates a review of the mark, result or decision.

Appeals are heard on the following grounds:

1. New evidence: i.e. evidence of circumstances affecting the student's examination performance that, through no fault of the student, could not reasonably have been presented at an earlier date.

2. Procedural or other irregularities in the conduct of the examination.

3. Procedural irregularities in the marking of the examination, e.g. evidence that the scripts have been insufficiently or incorrectly marked.

4. Evidence of prejudice or bias on the part of one or more examiners.

5. Inappropriate advice from members of administrative or academic staff on matters affecting the student's examination candidature or performance.

6. Failure of the University to implement its agreed procedures and regulations. Grounds for appeal must be specific. Reasons such as 'I deserved a better grade', or 'I thought I did better' are unclear and unhelpful. Appeals which challenge the professional academic judgment of examiners on the student's examination performance will not be considered. Appeals or representations are allowed as a way of ensuring that as far as possible all relevant circumstances surrounding examination performance are brought to light and taken into account in formulating results and decisions. Appeals should be lodged with the relevant Head of Department. Examination appeals must state clearly the grounds for appeal and should include all relevant information. The burden of proof is on the student, and the written appeal should state and support with available evidence the grounds for appeal. The Examinations Appeals Committee will consider the details of the appeal and decide whether the appeal is valid, and if so, what relief should be provided. The Committee does not usually hold hearings. The examination script may be re-marked only if the Committee so directs; there is no automatic re-marking/re-grading of scripts. However, for all appeals and queries received from students, the marks and/or results will be checked for errors, omissions and conformity with regulations, and a correction made where necessary. The Committee's decision is final and takes effect when issued. Examination scripts and the marks awarded for individual examination questions/answers are not shown to students.

C. Complaints Relating to Individual Course Instructors

A student who has a grievance relating to a course instructor (e.g., unsatisfactory teaching, unsatisfactory relationship with the course instructor) may follow these steps:

1. Raise concern with the course instructor as soon as the problem or difficulty arises. Most grievances can be resolved amicably and quickly in this manner. The student may take the matter directly to the Head of Department if need be.

2. Concerns related to an instructor that cannot be resolved at Step 1 should be discussed with the Head of Department (or Faculty Dean, if the Department Head is the instructor, or DVC/AA if the Dean is instructor).

3. If the complaint is not resolved at Step 2 above, the student may follow the Steps as in 1.3 through 1.5 under Section 1 above. The complaint review process is accomplished in a collegial nonjudicial atmosphere rather than an adversarial one and allows the parties involved to participate as appropriate. Complaints must be raised and resolved promptly and as soon as they arise during the course of the year. The student and instructor may enlist the aid of a neutral third party (e.g., counselor, academic advisor) to assist.

HUMANITIES

Although for administrative purposes the Departments of Environmental Science and Sociology are located in other Faculties, they are considered academically to be part of the Faculty of Humanities. In fact, a considerable number of students who major in Environmental Science and Sociology are Humanities students. With the flexibility that is afforded by semesterised courses, more departments in the Faculties of Business and Science will become accessible to Humanities students, especially through cross-faculty programmes. With the new focus on educating specialists in a generalist way, the Faculty values a well-rounded education with the requisite ICT and numeracy skills. The Faculty of Humanities concentrates mainly on those studies that specialise in understanding human ideas, behaviour, culture and its mediation, with a particular emphasis on humanity in Africa in relation to the rest of the world. This Faculty thus has a prime role to play in the discovery and the appreciation of the heritage and liberal arts of the societies of Africa in general and of southern Africa and Botswana in particular. In this regard, the Faculty of Humanities, through research and teaching in its academic departments, is in a privileged position to effectively contribute to the realization of the Vision and Mission of the University. In order to enable students who may wish to have an optional major other than English in this programme to do so, provision has to be made for such students to take extra credits beyond the stipulated 60–72 per semester. This means that the students may have to take a load of up to sixty credits. The ad hoc management sub-committee thus requests the relevant university authorities to grant permission to students to take a credit load of more than sixty credits, so as to accommodate such cases.

done in each of the 5 courses of that year and also in a case-based fully integrated examination at the end of the year.

The learning framework in Year 5 largely consists of contact with a wide variety of patients through an "assistant intern scheme". The PBL process continues but the emphasis changes to consider broader issues of patient management, so can properly be called case-based learning. Apart from the PBL sessions (which should as much as possible be on real patients), the tutor's role should concentrate on observation of and feedback on the student-patient encounter, rather than on transfer of factual information which the students can find out for themselves with appropriate guidance. Students must keep a record of skills they have acquired which has to be signed off by a senior member of staff.

Special Regulations of the Faculty of Medicine for the MBBS Programme

The important requirements to note for students reading for Bachelor of Medicine Bachelor of Surgery (MBBS) are:
1. Students need to meet minimum academic standards determined for each course/module to sit for the final examination for Phase I. Students need to pass Continuous Assessment (CA) to be allowed to sit for the Final Examination in Phase II.
2. Students are required to achieve 50% and above in the Final Examination to pass a course.

ASSESSMENT AND ACADEMIC PROGRESSION REGULATIONS

1.1 Senate’s General Academic Regulations

- The Senate’s General Academic Regulations of the University of Botswana (modified where necessary to accommodate the peculiarities of assessment in medical education), shall apply to all assessments in Phase I.
- All assessments in the Phase I of the MBBS programme shall be blueprinted to the three core themes of the programme:
  - Medical and related science
  - Doctor-patient relationship
  - Public Health Medicine

1.2 Academic Year

- The academic year in both years shall comprise 35 teaching weeks, a one week reading (revision) and three weeks to prepare for and undergo for a final integrated theory and practical examination.
- There shall be no semester courses in Phase I – courses vary from 2-6 weeks in duration. The SOM courses in both years are assessed at the end of each course (called ‘blocks’ in Phase I and ‘rotations’ in Phase II). However academic standing is determined and progression decisions are made at the end of each academic year.

1.3 Attendance

- Attendance of all contact sessions (PBL, clinical skills sessions, community and clinic placements, practical sessions, workshops and seminars) in all courses in Phase I is compulsory. Students are expected to have 100% attendance during these contact sessions in each course. Students who have attended less than 80% of the contact periods in any course (without valid reasons) will not be allowed to participate in the end-of-semester or end-of-year examination in that course and shall be awarded a zero mark in that particular examination.
- Absence and illness
  - Students requiring leave of absence for any reason should seek permission in advance from the Phase I coordinator and should notify relevant tutors and their PBL facilitator. Students who have to be absent unexpectedly for an urgent reason should notify the Phase I coordinator who will offer any help s/he can, and will inform relevant tutors of the student’s absence.
  - Students who are ill and whose illness causes them to miss a required session, an examination, a summative assessment, or a submission date must inform the Phase I coordinator or their PBL facilitator and provide a doctor’s certificate as soon as possible. If their absence is prolonged (more than 1 week), if they are repeatedly absent, or if their illness causes them to request a suspension of their studies they should ask their doctor to provide more detailed information to the Phase I coordinator.
- If a student is unable to meet the required minimum of 80% attendance of contact sessions in any course due to exceptional or extenuating circumstances, the candidate may be admitted in the end-of-course and end-of-year examination provided that the Dean had been notified in writing (with copies to the Phase I coordinator and Head(s) of Department concerned) within 48 hours of the event. Such a letter should describe the nature of the circumstance. In all cases the department(s) concerned should advise on the preparedness of the candidate to sit for the exam or be considered for a special examination.
- If a student has met all the requirements in any course, but is unable to sit for the end-of-course or end-of-year examination due exceptional or extenuating circumstances (bereavement, ill health or other circumstances that may cause emotional trauma), for which the Dean has been duly notified, the candidate can apply to be considered for a special end-of-course or end-of-year examination. The special examination must take place before the beginning of the next academic year but not earlier than 48 hours after the student is certified fit to sit for the examination.
- Once a student has sat for the end-of-course or end-of-year examination, he or she may not afterwards apply for a special examination on the basis of unforeseen circumstances.

1.4 Progression from Year to Year

Progression through the Programme is dependent on a student demonstrating the following:
- Suitable engagement with and application to the Programme, usually measured by attendance at classes and involvement in coursework.
- Sufficient progress in academic work and acquiring of skills, usually measured by summative assessments to pass to the next stage of a student must:
  - Obtain at least 50% overall for each course and pass all courses in each stage.
  - Fulfil the attendance and performance requirements within the Programme, including attendance at all PBL, clinical skills and clinical placement and practical sessions. Attendance and engagement at all these sessions will be recorded.
- Absence and illness
  - Students requiring leave of absence for any reason should seek permission in advance from the Phase I coordinator and should notify relevant tutors and their PBL facilitator. Students who have to be absent unexpectedly for an urgent reason should notify the Phase I coordinator who will offer any help s/he can, and will inform relevant tutors of the student’s absence.
  - Students who are ill and whose illness causes them to miss a required session, an examination, a summative assessment, or a submission date must inform the Phase I coordinator or their PBL facilitator and provide a doctor’s certificate as soon as possible. If their absence is prolonged (more than 1 week), if they are repeatedly absent, or if their illness causes them to request a suspension of their studies they should ask their doctor to provide more detailed information to the Phase I coordinator.
- If a student is unable to meet the required minimum of 80% attendance of contact sessions in any course due to exceptional or extenuating circumstances, the candidate may be admitted in the end-of-course and end-of-year examination provided that the Dean had been notified in writing (with copies to the Phase I coordinator and Head(s) of Department concerned) within 48 hours of the event. Such a letter should describe the nature of the circumstance. In all cases the department(s) concerned should advise on the preparedness of the candidate to sit for the exam or be considered for a special examination.
- If a student has met all the requirements in any course, but is unable to sit for the end-of-course or end-of-year examination due exceptional or extenuating circumstances (bereavement, ill health or other circumstances that may cause emotional trauma), for which the Dean has been duly notified, the candidate can apply to be considered for a special end-of-course or end-of-year examination. The special examination must take place before the beginning of the next academic year but not earlier than 48 hours after the student is certified fit to sit for the examination.
- Once a student has sat for the end-of-course or end-of-year examination, he or she may not afterwards apply for a special examination on the basis of unforeseen circumstances.

1.5 Minimum Standardization Requirements (Standard Setting)

- According to the Faculty of Medicine Regulations on assessment, both internal and external moderation of assessment tasks shall occur.
- All written examination questions shall be internally moderated by a panel of examiners selected from the
relevant disciplines. This panel will carry out a pre-
assessment moderation of all the questions not later
than 6 weeks before the date of the examination. In
the case of the end-of-year integrated examination, all
internally moderated questions must also be externally
moderated by an external examiner appointed by the
Dean, FOM on behalf of Senate, following departmental
recommendation and endorsement of the Faculty
Board. The HOD (Biomedical Sciences) must ensure that
the internally moderated questions are sent to their
appointed external moderators not later than 4 weeks
before the commencement of the examination. Such
an external examiner shall serve for three consecutive
years and shall not be re-appointed. The function of the
external examiner shall be limited to the moderation of
questions in the end-of-year integrated examinations
in Phase I.

- After each end-of-course or end-of-year examination
has been marked the pass mark is calculated using
the modified Cohen method or similar and individual
student marks adjusted accordingly.

1.6.0 Assessment

1.6.1 Continuous Assessment for non-Public Health
Medicine Courses

Assessment of students’ progress shall be on a
continuous basis. Formative assessment shall take place
formally as well as informally throughout each course.
Continuous assessment shall carry 40% of the year mark
in each course. The following shall form the components
of continuous assessment in each course:

- PBL assessment: this is made up of an assessment of
each student’s performance in PBL sessions as judged by
the facilitator
- Biopractical/workshop/seminar write-ups or oral
presentations
- Other forms of work suitable for assessment.
Final continuous assessment marks must be ready and be
forwarded to the Phase I coordinator not later than 14
calendar days after the course. The Board shall consider
and formally issue progress reports on each student
during the following meeting of the Board after each course.

The format of continuous assessment shall be the same
for all the non-Public Health Medicine courses in Phase I.

1.6.2 End-of-Course Examinations for non-Public Health
Medicine Courses

- For each course in both year of Phase I examinations
take place in the form of a written examination taking
place in the last week of the course, which shall carry
60% of the year mark.
- The examination will consist of MCBs, EMIs and short
answer questions. The examination will normally be
two hours long but could be longer or shorter for courses
of non-standard length.

1.6.3 ‘Integrated Medical Science’ Courses (SOM 20B and
SOM 310)

At the beginning of the Winter Semester in each year in
Phase I a course with this name will be presented. Each
will be three weeks long, providing a one week revision
period and a two week examination period. These courses
will take place after all system based courses have been
completed but before the community attachment
courses are taken. Students will be required to pass these
courses in each year in order to proceed to the next year
of the programme. The assessment of these courses will
contain no continuing assessment (CA) component, but
3 exams in the following format:

- An objective structured clinical exam (OSCE) providing
20% of the final mark for the course. This exam assesses
basic communication and physical skills using patients
(normal/simulated), biostatistics, epidemiology and data
and information search.
- An Anatomy/Histology spot test or practical exam also
providing 20%.
- A minimum of a single Integrated Medical Science
written exam: an integrated exam based on cases. This
examination will contain material from all courses
and all programme themes. It will contain several
types of question format: multiple choice, extended
matching, and very short answer questions. The written
examinations will provide 60% of the final mark for the
course. Given the amount of information learnt during
the year, it is likely that more than 1 integrated medical
science exam will be written, however there will be 1
mark for this exam.

A student must attain/achieve a minimum mark of 50% in
each component to pass these courses. There shall be
no compensation of marks from one component to
the other. All examination components in all the courses
shall be externally moderated by external examiners
appointed by the Senate of the University of Botswana.

1.6.4 Assessment for Public Health Medicine Courses
(SOM 20B and SOM 308)

In the Public Health Medicine courses there is no
continuous assessment mark. A final course mark is
allocated at the end of the course from the following
components: a written group project report; a group
project presentation; a group poster presentation;
individual performance in an online Ethics course; a
personal reflection; and an individual attendance and
participation mark.

- Each component of the examination must be passed
in all courses. There shall be no compensation of marks
from one component to the other.

1.7.0 Re-assessment Opportunity

The following regulations shall apply to students who fail
to obtain pass marks at the first assessment opportunity:

1.7.1 A student who fails to obtain a pass mark in up
to 40% of attempted year credits in a year, shall apply for
supplementary examination in the failed courses.
The mark for the reassessed courses shall be recorded as
the minimum required for the student to pass if the
student scores higher than this. However, if a student
obtains a lower mark after being reassessed, the initial
mark obtained in the end-of-year examination shall be
recorded as the final mark. The continuous assessment
marks for any student supplementing a course shall
count in the final computation of the year mark.

1.7.2 A student who supplements a course and fails to
obtain a pass mark shall repeat the year of study. Such
a student must repeat all the courses for that year
and meet all requirements for that year before being
admitted to the ‘Integrated Medical Science’ course and
examination.

1.7.3 A student who fails to obtain a pass mark at the end
of a repeat year shall be discontinued from the MBBS
programme. A student who is discontinued from the
MBBS programme shall not be eligible for re-admission
into the programme. Such a student may apply to
another programme for which the student qualifies.

1.7.4 A student who fails 50% to 60% of more of the
year attempted credits, shall repeat the year of study.
Such a student must repeat all the courses for the year
and meet all the requirements including continuous
assessment and final examination for all courses for the
repeat year. Any student who fails to obtain a pass mark
at the end of the repeat year shall be treated as in (1.7.3)
above.

1.7.5 Notwithstanding the foregoing Faculty of Medicine
special regulations on assessment in Phase I of the MBBS
programme, Senate has the power to overrule any of
the regulations. In such cases, the Senate General regulations
on assessment shall supersede the provisions of any or all
sections of the regulations set forth in this document.

education), shall apply to all assessments in Phase II.

- All assessments in the Phase II of MBBS programme
shall be blueprint to the three core themes of the
programme:
  - Medical and related science
  - Doctor-patient relationship
  - Public Health Medicine

2.2 Academic Year

- The academic year shall comprise 40 teaching weeks,
a one week of reading (revision) and two weeks of
examination.
- All courses in Phase II shall be yearlong courses and
progression decisions shall only be made at the end of
the year. There shall be no semester courses and academic
standing is determined at the end of the academic year.

2.3 Attendance

- Attendance of all contact sessions (clinical ward
work, PBL, whole class lectures, community placements,
tutorials and others as may be determined by the
department) in all courses in Phase II is compulsory.
Students are expected to have 100% attendance during
their clinical work and community programmes. Students
who have attended less than 80% of the contact periods
in any course (without valid reasons) will not be allowed
to participate in the end-of-year examination in that
course and shall be awarded zero mark in that particular
examination. They will have to repeat the clinical
rotation period in that course and meet up the minimum
80% attendance before being assessed.

- If a student is unable to meet the required minimum
of 80% attendance of contact sessions in any course(s)
due to exceptional or extenuating circumstances,
the candidate may be admitted in the end-of-year
assessment provided that the Dean had been notified
in writing (with copies to the Phase II coordinator
and Head of Department concerned) within 48 hours of
the event. Such letter should describe the nature of
the circumstance. In all cases, the department concerned
should advise on the preparedness of the candidate to sit
for the exam or be considered for a special examination.

- If a student has made all the requirements in
any course(s), but is unable to sit for the end-of-
year examination due exceptional or extenuating
circumstance (bereavement, ill health or other circumstances that may cause emotional trauma) for which the Dean has been duly notified, the candidate can apply to be considered for a special end-of-year examination. The special examination must take place before the beginning of the next academic year but not earlier than 48 hours after the student is certified fit to sit for the examination.

- Once a student has sat for the end-of-year examination, he or she may not afterwards apply for a special examination on the basis of unforeseen circumstances.

2.4 Progression from Year to Year

A student must pass all the components of the assessment (written, clinical etc.) and meet all the requirements for that year in all courses before progressing to the next year of study. There shall be no carry over. The pass mark shall be 50%. All high stakes examinations shall undergo minimum standardization before being administered, or during the examination in case of the clinical component.

2.5 Minimum Standardization Requirements (Standard Setting)

- According to the Faculty of Medicine Regulations on assessment, both internal and external moderation of assessment tasks shall occur.

- All written examination questions shall be internally moderated by a panel of examiners selected from the clinical specialties. This panel will carry out a pre-assessment moderation of all the questions not later than 6 weeks before the date of the examination. All internally moderated questions must also be externally moderated by an external examiner (in each course) appointed by the Dean, ROM on behalf of Senate, following departmental recommendation and endorsement of the Faculty Board. All HDOs must ensure that their internally moderated questions are sent to their appointed external moderators not later than 4 weeks before the commencement of the examination. Such an external examiner shall serve for three consecutive years and shall not be re-appointed. The function of the external examiner shall be limited to the moderation of questions in all high stakes examinations in Year 3. In Years 4 and 5 however the external examiner shall moderate the questions and be invited to examine in the clinical component of the examination.

- After each end-of-year examination has been marked the pass mark is calculated using the modified Cohen method and individual student marks adjusted accordingly.

2.6.0 Assessment

2.6.1 Continuous Assessment (CA) in Clinical Courses

Assessment of students' progress in all three years of Phase II shall be on a continuous basis. Formative assessment shall take place informally all through the clinical rotation period in all the courses. Clinical instructors are expected to monitor each student's performance in their courses through various methods such as case presentations, PBL sessions, workplace-based assessment etc. and promptly give feedback to the students on their level of performance. The continuous assessment shall carry 40% of the year mark in each course (other than SOM 606 'Integrated Clinical Practice' which carries no CA mark). The following shall form the components to be assessed using the logbook:

- Clerking and presentation of patients: Each student in the firm must clerk and present a minimum of one case per week (assigned by the clinical instructor(s)). This shall carry 10% of the continuous assessment mark.

- Workplace-based assessment: this shall consist of mini-clinical examinations (mini-CEXs), direct observation of practical skills (DOPS) etc. Each student must complete the number of procedures outlined in the department’s logbook. The procedures shall be categorized into those observed (O), assisted in (A) or performed (P) by the student. This must be dated and signed by the supervising clinician. Students are expected to carry out 100% of the listed procedures to be logged in as determined by the department before they can sit for the examination. This shall carry 10% of the continuous assessment mark.

- Formulation of management plan and evidence-based decision making: This shall follow the student's patient presentations and will involve requisition of laboratory or imaging procedures to aid the diagnosis/management and interpretation of the same by the student etc. In all cases, the student is expected to follow-up the patient until discharge or demise of the patient. In the latter case, if an autopsy is requested the student must attend the autopsy session and write down the findings as part of the documentation of the patient's illness. This shall carry 10% of the continuous assessment mark.

- Engagement with the PBL process: All students are to be assessed during their PBL session for attendance, contribution and reflective ability on each case. This shall carry 10% of the continuous assessment mark.

- The continuous assessment in Public Health Medicine will consist of student presentations on the field activity (10%), personal reflection (10%) and report on the community project (20%).

2.6.2 Continuous Assessment (CA) in the Public Health Medicine Course in Year 4

2.6.3 Management of Continuing Assessment (CA) marks

- All continuous assessment (CA) marks must be ready to the School of Medicine.

- It shall be administered in each course as follows:
  a. Knowledge and understanding paper: comprising MCBs and extended matching items (EMIs) worth 90 marks (1 hour 30 mins) in each course.
  b. Key clinical features: short answer questions (SAQs) around clinical presentations worth 90 marks (1 hour 30 mins)

- Each component of the examination must be passed. There shall be no compensation of marks from one component to the other. All examination questions in all the courses shall be externally moderated by external examiners appointed by the Senate of the University of Botswana.

2.6.4(ii) Year 4 Examinations

In Year 4, the following shall form the components of the examination:

A. For clinical courses

Written Examination

There shall be one written paper principally assessing understanding and application, comprising MCBs, EMIs and SAQs worth 120 marks (2 hours) in each course. This shall carry 20% of the year mark. All examination questions shall be externally moderated by external examiners appointed by the Senate of the University of Botswana.

B. For the Elective and Research Course (Rotation)

There will be no CA mark for this course. It shall be graded as pass or fail, in each of its two components:

- At the end of the 8 week elective course, students are required to submit an individual 1500 word scientific report on the project and/or what they studied during the elective period under the guidance of a designated supervisor(s).

- At the end of the first 4 courses of the year (i.e. before the 6 week Elective rotation commences) students are required to submit a 3000 word report on the research project they have undertaken in small groups and under supervision throughout the year.

Both the written exams and the OSCEs written papers will be structured common clinical cases. Each of these ‘cases’ will contain questions related to the aetiology, presentation, diagnosis, management and/or prevention of the condition concerned, drawn from a variety of relevant clinical and biomedical disciplines (including Pharmacology) as well as Public Health Medicine, Ethics, Forensic Medicine and Toxicology. Together they will contribute 50% to the final mark for the course. Two integrated OSCEs in the same format as described above. There shall be up to 16 OSCE stations altogether for this component of the examination (8 in each OSCE). Each shall be for a minimum of 10 minutes and a maximum of 15 minutes. Together they will contribute 50% to the final mark for the course. All exams will be blueprinted according to given learning outcomes. All written and clinical examinations shall be externally moderated by the external examiners appointed by the Senate of the University of Botswana. There shall be one external examiner for this course. The written papers will be standard set using the modified Cohen method. Both the written exams and the OSCEs have to be passed to pass the course. There shall be no compensation of marks from one to the other. This rotation has to be passed to pass the year. The usual regulations for supplementary examinations will be applied. 2.7.0 Re-assessment Opportunity 2.7.1 Supplementary Examination Subject to the Senate General regulations on assessment (section 00.95), and the Faculty of Medicine Special Regulations on assessment in the MBBS programme, supplementary examination shall be held within six (6) weeks after the end-of-year examination result has been published and in any case, not later than the 3rd week of July. The 6 weeks’ time shall be a remediation period for the students who qualify for supplementary examination at the end-of-year examinations in Years 3, 4 and 5 – so too for the Integrated Clinical Practice course examination. However, if a student obtains a lower mark after being reassessed, the initial mark obtained in the end-of-year examination shall be recorded as the final mark. The course marks (CA) for any student supplementing a course shall count in the final computation of the year mark, in courses where CA marks are used to compute a final mark. 2.7.3 A student who supplements a course and fails to obtain a pass mark shall repeat the year of study. Such a student must repeat all the courses for that year and meet all requirements for that year before being admitted to the end-of-year examination. 2.7.4 A student who fails to obtain a pass mark at the end of a repeat year shall be discontinued from the MBBS programme. A student who is discontinued from the MBBS programme shall not be eligible for re-admission into the programme. Such a student may apply to another programme for which the student qualifies. 2.7.5 A student who fails up to 3 or more courses in the year (up to 50% or more of the year attempted credits), shall repeat the year of study. BSc 201-APPLIED GEOPHYSICS PROGRAMME

Entry Requirements

(a) Admission to the Applied Geophysics Degree Programmes shall be as specified in the Faculty of Science Regulations 23.2.1 and 23.4.

(b) Students who wish to register for Applied Geophysics at Level 200 must have taken and passed Mathematics, Physics, Chemistry and Geology at Level 100.

(c) A student admitted to Level 200 Applied Geophysics who has successfully completed Level 100 Geology courses must comply with the University of Botswana Academic General Regulation 00.311 by taking relevant General Education courses or Elective courses in consultation with the Head of Department.

Award of Degree
To be awarded a Bachelor of Science Degree in Applied Geophysics a candidate must have taken and passed the relevant courses prescribed in section 9 and must satisfy General Academic Regulations 00.85 and 00.9 and Faculty of Science Special Regulation 23.7.

Programme Structure
The Programme is designed in such a manner as to gradually introduce students to the principles of Applied Geophysics in the third year. It is envisaged that at this level, students are sufficiently grounded in the basic theories and principles used in Geophysics and can appreciate all the scientific/practical developments in this field they are likely to encounter. They should have been exposed to adequate field work through the geologic field course taken during Level 100 and 200.

The fourth and final year consists of the completion of the Geology and Applied Geophysics courses and emphasis is placed upon application of the various geophysical methods in exploration and fieldwork (where the students will be acquainted with the use of various geophysical equipment) which forms a major component of the course.

The courses are also designed to satisfy the required training expected for an applied geophysicist. This will enable graduates of the programme to qualify to be members of professional societies such as the Society of Exploration Geophysicists (SEG).

In the final year students will have the option of choosing either the Mining Geophysics or the Environmental Geophysics Stream, the latter including geotechnical and groundwater studies.
